## Workflow examples

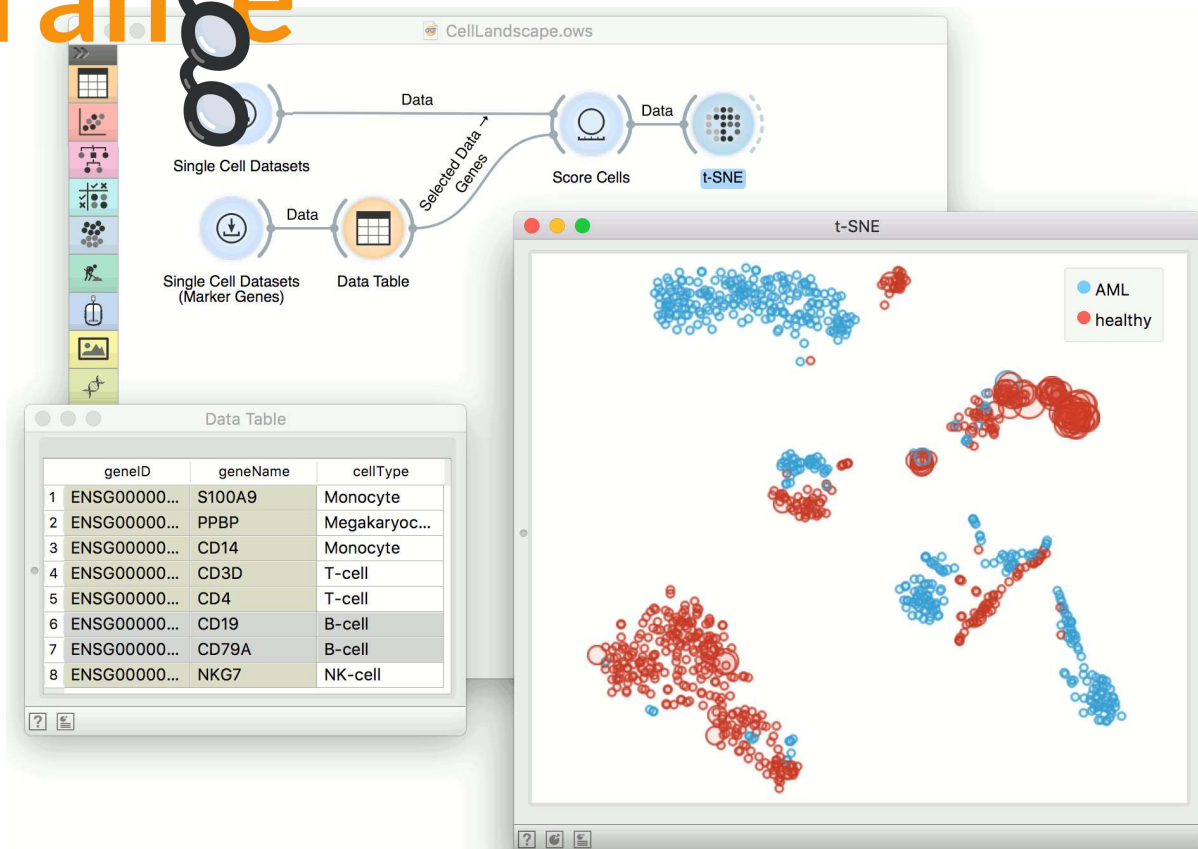

Software Orange includes a wide array of workflow templates designed to help you get familiar with the application. Pick Templates on the Welcome screen to explore.

## Widget catalog

Orange widgets are building blocks of data analysis workflows that are assembled in Orange's visual programming environment. Widgets are grouped into classes according to their function. A typical workflow may mix widgets for data input and filtering, visualization, and predictive data mining. Here you can get list of all widgets available in Orange.
