

# Instructions to be followed for the First Lab (8<sup>th</sup> Jan – 12<sup>th</sup> Jan 2024)

## PART - I

- Tutorial sheet needs to be distributed to each student
- Each student answers the tutorial sheet without discussing with his friends/TA/RA
- Scale is NOT be used by the students, this is free hand sketching
- Mobiles of the students are to be kept with the teaching assistants and given only while leaving the class
- Please draw **any product** (not a very simple one) using free hand sketch – **5 points** for this

After the successful completion of PART – I, students are to do the following

## PART - II

- Student will install the software FUSION 360.
- Guidelines for loading the software in their laptops is already shared in the Moodle
- If the installation gets over, students are to sit and watch the video on FUSION software. The link for watching the video is as follows
- <https://www.autodesk.com/certification/learn/course/learn-fusion-360-in-90-minutes>
- If student has come to lab without laptop, please ask the student to bring the laptop by going to hostel and return before the completion of the lab. But, allow the student first to complete PART I without laptop
