

How to submit an activity?

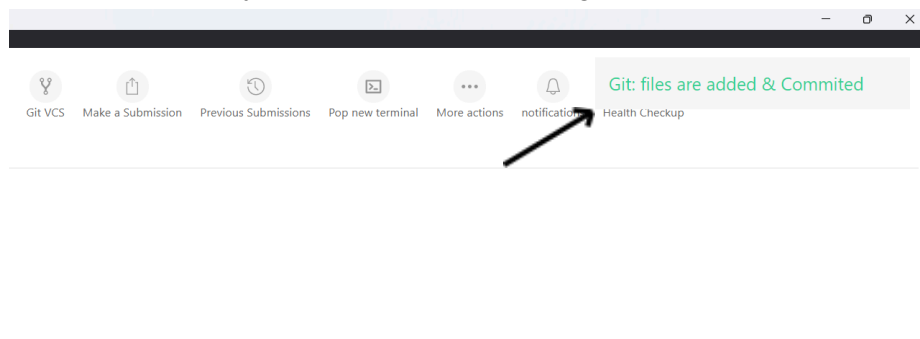

Step 1: Make sure that your changes are properly saved. Open “Git VCS”:-

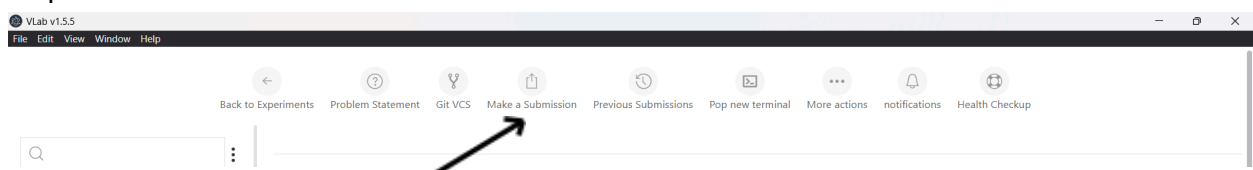

You'll see this window, type any string in the textbox as you like and click “COMMIT” =>

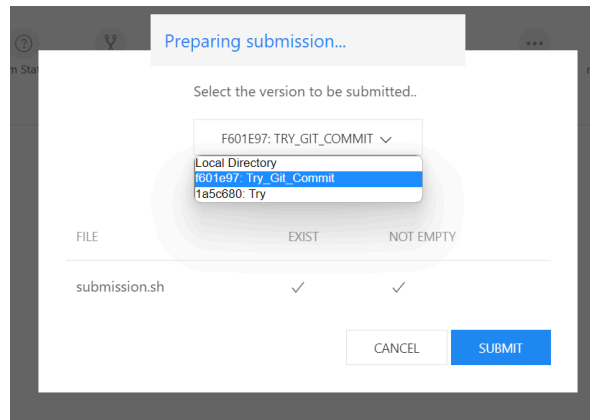

If the Commit was successful, you'll this pop-up on top right =>

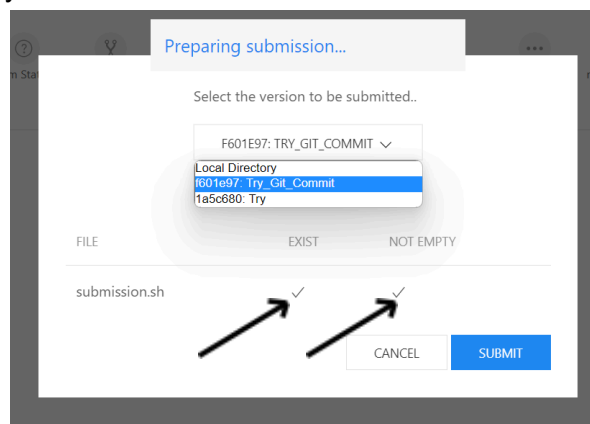

Step 2: Click on “Make a Submission” button =>

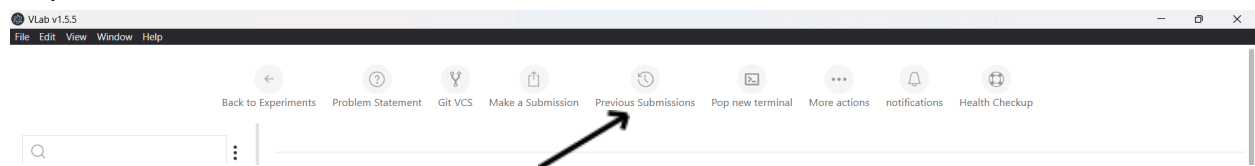

You'll see this window, click on the drop-down and select the string that you entered for Git VCS in Step 1 and click “SUBMIT” =>

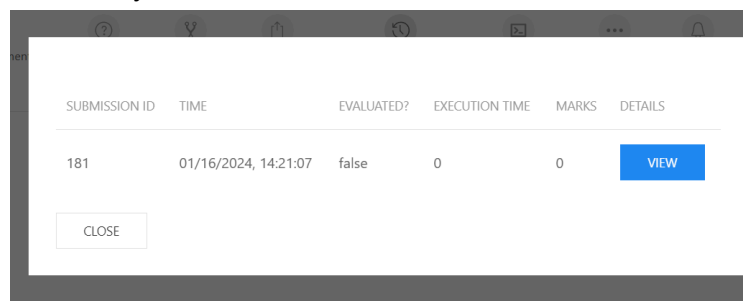

Ensure that there are only ticks and no crosses in this window to submit successfully =>

Step 3: Click on “Previous Submissions” =>

You should see the last time you had a successful submission =>

To download your submission, go outside the activity and click this button =>

Activity 1 - Copying all files

You have two folders, "input" and "output". "input" has files and subfolders, while "output" is an empty directory.

You can then successfully download the .tgz file. Unzip it and you'll get the files that you have submitted to us !
